SUMMARY

Computer Science Engineering graduate specializing in Artificial Intelligence with hands-on experience in building AI-powered tools, automation systems, and real-time dashboards. Experienced in developing practical applications using Python, JavaScript, Supabase, and webhook integrations. Passionate about leveraging AI and software engineering to build scalable solutions and solve real-world business problems.

SKILLS

Programming Languages: Python, SQL

Web Technologies: HTML, CSS, JavaScript

Tools & Platforms: Supabase, ClickUp Webhooks, Git, VS Code

PROFESSIONAL EXPERIENCE

Full Stack Engineer Intern — Surepass Technologies | Oct 2025 – Feb 2026

- Developed a Caller Dashboard integrated with Supabase database to track sales team call logs and call recordings in real time.
- Built an AI agent capable of detecting gambling-related websites and content from social media platforms using keyword-based search.
- Designed and implemented a Sales Performance Dashboard integrated with ClickUp webhooks and Supabase to monitor sales metrics.
- Automated data flow between ClickUp and internal dashboards through webhook integrations.
- Contributed to developing scalable monitoring tools for sales operations and compliance detection.
- **Tech Stack:** JavaScript, Python, Supabase, ClickUp Webhooks.

PROJECTS

Music Streaming Web Application — Dec'23

- **Dynamic Song Listing:** Implemented asynchronous JavaScript functions to dynamically fetch and display songs from server directories, enhancing user experience by providing real-time updates to the playlist without page reloads.
- **Album Display with Metadata:** Developed a feature to showcase albums along with cover images and metadata fetched from server-side JSON files, enhancing user engagement through visually appealing album previews and detailed information
- Tools/Technologies Used: **HTML, CSS, JavaScript, VS Code**

AI Chatbot Application — Jan'25

- Built a responsive AI chatbot with real-time streaming responses.
- Implemented **dark/light mode** and a modern UI with Tailwind CSS, Radix UI, and Lucide icons.
- Designed a **scalable Next.js architecture** with TypeScript for type safety and maintainability.
- Integrated **environment-based configuration** for secure API key management.

Agri Growth: Leveraging Machine Learning and Deep Learning for Precision Farming — Dec'24

- Created models for Plant Disease Prediction, Fertilizer Recommendation, and Soil Quality Prediction.
- Implemented image-based monitoring for plant disease detection using deep learning models.
- Enhanced resource use and minimized waste.

EDUCATION

Sathyabama Institute of Science and Technology, Chennai, India **2021 - 2025**

- Bachelor of Engineering (B.E) in Computer Science and Engineering | CGPA: **8.14/10.00**

M.P. College Arakapur, India **2019 - 2021**

- Class XII

D.A.V Centenary Public School, India **2018**

- Class X

CERTIFICATIONS

COGNIBOT AI meets Industry TRAINING (Machine Learning) **01/2023 – 04/2023**
AWS Cloud Certification by Credo Systems **07/2023 – 09/2023**
PCAP- Certified Associate in Python Programming **06/2025**

LANGUAGES

Hindi English
